Welcome to The Riddler. Every week, I offer up a problem related to the things we hold dear around here — math, logic and probability. These problems, puzzles and riddles come from lots of top-notch puzzle folks around the world, including you, the readers. You'll find this week's puzzle below.

Mull it over on your commute, dissect it on your lunch break, and argue about it with your friends and lovers. When you're ready, **submit your answer using the form at the bottom**. I'll reveal the solution next week, and a correct submission (chosen at random) will earn a shoutout in this column. Important small print: To be eligible for the shoutout, I need to receive your correct answer before 11:59 p.m. EDT on Sunday — have a great weekend!

Before we get to the new puzzle, let's return to [last week's](#) . Congratulations to
