PARAMUS, New Jersey, September 6, 2016 /PRNewswire/ --

Qognify, formerly NICE Security, today announced that its video management system (VMS) has been chosen by a major casino in Asia, to deliver 24x7x365 monitoring. The VMS will deter and prevent disruptive and unlawful behavior, enable the security team to manage incidents with minimal disruption to the gaming floor, and make its 10 million annual visitors feel safe.

Qognify is relied upon by a strong install base of casinos worldwide, including many of the largest and busiest gaming establishments. This major project further strengthens Qognify's position as a leader in [video surveillance](#) for the gaming industry.

The casino will benefit from Qognify's unprecedented levels of resilience and reliability, with its award-winning VMS delivering 100% system availability and zero downtime, for uninterrupted 24x7x365 continuous video surveillance monitoring across the entire estate. High definition video will deliver exceptional levels of detail for a wide range of purposes including card games and money-counting areas. Through the [Qognify VMS](#), operators will be able to adjust cameras remotely, enabling them to quickly change views to focus on specific areas and events.

"Gaming establishments are very challenging environments for security to operate. Through our 20 years' experience working with casinos, we have developed an exceptional enterprise solution the meets their demanding requirements on the gaming floor and in the back-office," comments **Moti Shabtai, President of Qognify**. "Our VMS delivers cost-effective high-quality video monitoring of the entire casino operation. This facilitates quick and effective prevention of potential security issues, promotes the safety of guests, guarantees gaming continuity and protects the integrity of casino operations."
